

ARTBAR SPECIAL

UPSIDE-DOWN TREES

Bring home an old ArtBar favorite by designing your own upside-down tree, inspired by MASS MoCA artist Natalie Jeremijenko's famous on-campus installation, *Tree Logic*.

MATERIALS

Cork
Wire
Beads
Pipe Cleaners
Scissors

INSTRUCTIONS

- 1 With the help of an adult, bend your wire into a "U" shape, securing both ends of the wire into a cork. (Adults—you may first need to poke two holes in one end of the cork to be able to insert the wire.)
- 2 Decorate the wire by wrapping it with beads and pipe cleaners. How will you use these materials to create branches and leaves?
